

It's a great time to switch to green energy...

We help commercial and domestic clients save energy, reduce their fuel bills and make a profit. There's never been a better time to switch to green energy, with the government's **Renewable Heat Incentive** to help with the cost of installation and provide you with the opportunity for ongoing financial rewards.

Our Latest Case Study

BTS Fabrications are based over on Newton Aycliffe Industrial Estate have recently worked with D & J Franks to have a state of the art Biomass Heating Installation, which through the Government's Renewable Heating Incentive will offer favourable returns for their business. The project is predicted to save the business substantial amounts on their fuel bills and over the next 20 years they can enjoy an estimated revenue in excess of over £400,000. To find out more about the installation, visit our website!

March 2016 RHI Announcements

On the 3 March 2016 DECC announced a number of minor changes to the Renewable Heat Incentive (RHI). These changes came into force on 24 March 2016. These amendments will be made alongside the updating of scheme degeneration triggers for 2016/17 and changes to indexation linking tariffs for new scheme participants. There are also updates to the land criteria for sustainability. The amendments will:

- Ensure consistency in rounding of tariffs; and
- Change the detailed wording of the requirements

Why Choose and Recommend Us?

Our interest in warmth and energy began way back in the 1900's in the days of the mining industry. David Franks, the founder of D&J Franks Renewables, is proud to recognise that both his grandfather (Benjamin Franks) and his father (David Franks), were highly regarded miners in the local North East coal fields. The business gained over 30 years of experience as specialist Gas Safe Registered and Worcester Bosch Accredited Gas Heating engineers, offering full project management, maintenance and servicing to both commercial and domestic customers. With D&J Franks Renewables, you can:

- Generate and use green heat as well as receive an income under the Renewable Heat Incentive (RHI)
- Save money whilst making money
- Reduce fossil fuel costs by between 30 - 50%
- Reduce CO2 emissions by up to 96%

NEWSLETTER- REFERRAL PARTNERS
